At the close of a long prayer by a father who had prayed for a poor family, his son said: "Father, if I had as much you have, I would answer that prayer myself."

A well known mining superintendent was recently heard to express himself as very hopeful of material improvement in times this fall. 'Tis high time the balm began to loom up in Gilead.—Chronicle.

Reno Journal says that the Sunset mining company of White Horse has been incorporated. The officers are W. H. A. Pike, president; N. A. Hummel, sec'y; John Schwalt, treasurer, and J. A. Crosby superintendent.

Mrs. Margery Trask, of San Francisco, accompanied by Miss Jennie Allen, arrived in Carson yesterday on a visit to her brother, Deputy Controller Morton Horton. The ladies are stopping at the Arlington.

Alameda has begun to use asphaltum pipes for her water mains. They are now being laid by the Asphaltum Pipe Company and are the first ever put in practical use. Senator Jones proposes to give the new pipe a trial at Santa Monica.

London has a strange novelty in the shape of a cab moved by electricity. The three wheeled carriage driving along without any visible motor may be stopped and directed apparently with little effort, and runs at the rate of a mile in three minutes.

The town is again thrown into a commotion over rumored changes in the public schools. The APPEAL holds as it always has that politics should not be introduced in the public schools, and any changes except for cause, are not endorsed by the rank and file of the Silver party.

Senator Martin has been misquoted by the Associated Press on the silver question. What the Kansas Senator did say on his return to Topeka last week was this:

"The silver men, Democrats and Republicans, are in favor of the repeal of the Sherman silver bill only on condition that something can be agreed upon to take its place. The original Bland bill would be acceptable as a compromise, or the suggestion made by Senator Plumb in his speech of July, 1890, for the free coinage of American silver, would do. All agree that the Sherman bill is an infamous measure and that it was gotten up for express purpose of injuring the standard of silver, but its unconditional repeal would be a practical demonetization of the metal."

This does not sound as if Martin favored the unconditional repeal of the Sherman law, or that he was committed to the restoration of the Bland act, unamended by a compulsory coinage clause.

THE PUBLIC SCHOOL.

Pros and Cons of the Contemplated Changes.

The rumor that the School Trustees have decided to make at least three changes in the Public School, has caused considerable commotion in this city and the town is in a turmoil.

While the Trustees have made no statement regarding their contemplated action, it seems generally understood that Miss Mills and Miss Morton are the teachers to be displaced and that Miss Bardenwerper resigned because she expected to be called upon to do so.

Yesterday a petition was circulated and received numerous signers, requesting the Trustees to make no changes in the Public Schools, except for cause.

Some of our citizens believe that there are teachers in the schools that do not give the best of satisfaction, and that if they think their positions are for long terms they are not apt to attend to their duties so well.

The general consensus of opinion, however, was that there is no reason for changes and that the present teachers are competent.

In connection with this matter the APPEAL has received complaints to the effect that during the examinations the pupils are treated unfairly.

That some, the instant they hesitate in answering a question are told to sit down, and given a discredit mark, while the favored ones are allowed another chance if they miss.

If such favoritism is shown, steps should be taken to prevent it. The APPEAL knows nothing of the truth or falsity of these charges, but large numbers of people have been present at the examination, and they can easily call to mind such instances of favoritism, if they existed.

It was rumored last evening that Miss Morton had resigned and accepted a call to Verdi.

Dr. Guinan authorized the statement that there will be no changes except for cause.

Wide Wagon Tires.

It is only a question of time when broad wagon tires will be seen on all our wagons employed for hauling merchandise and freight, the same as may be seen in all the capitals of Europe. The Ontario Department of Agriculture has sent out a valuable special report, or bulletin, setting forth the treatment necessary to make, as well as to maintain, good roads. The report says the repairing of roads once a year (the usual plan) is wrong in principle. It is all the more objectionable, as almost always it is done in the Spring, the good effects disappearing before the time for Fall and Winter travel sets in. The report strongly commends the movement in favor of wide tires for draft vehicles. It says it has been proved by repeated experiments that wheels with tires two and one-half inches wide cause double the wear of wheels which have four and one-half inch tires. The wide tire has a tendency to roll the roadbed and keep it smooth at the same time, while the narrow one cuts it up and requires more hauling force for the same weight of load, besides spoiling the thoroughfare. Most of the European countries have laws regulating this matter.

About a year ago the Carson Valley ranchers began using the wide tire and they say that in future they will use nothing else. The roads have been considerably improved and the tires wear much longer.

A Mixed Case.

Yesterday morning Cole Atherton missed his horse and buckboard, but subsequently learned that the animal was seen being driven near Genoa.

Cole sent the Sheriff after the outfit and the man driving found to be M. Cohn's blacksmith. He called in the morning and said:

"The boss wants his horse hitched up."

The man at the yard thought "the boss" meant Atherton and hitched up the wrong horse. They are now trying to figure who pays the Sheriff's expenses.

A Terrible Cyclone.

Perry, Kas., June 22—A cyclone half a mile wide and six miles long, accompanied by rain and the darkness of midnight, passed through Williamstown and the adjacent country. Ten bodies have been found, and it is known that at least five more are dead. All were horribly mangled and some torn to pieces. Several are seriously hurt, and probably twenty are killed, all told. Thirty houses were blown down.

Christian Endeavor Sandwiches.

When the editor of the APPEAL left San Francisco last Tuesday he rode on the same train as the Christian Endeavor Association. They were bound for the World's Fair, and the Pullman conductor said to the writer. "This is the queerest crowd I ever struck; I guess most of them never rode on a Pullman before. They don't know how to pump water into the basins, and they think the closets labeled 'Ladies' and 'Gentlemen' are news stands. Bless me, if they didn't take the towels for napkins, and they think the words 'upper' and 'lower' on their berth tickets refers to the price of their accommodations. One girl asked me if the 'Porteress' was coming to put her to bed. But they are very kind to me, and gave me a package of sandwiches to eat."

Here the conductor opened the package and then opened the sandwiches. There was no sign of meat between the thin slices of bread, and very little butter.

The conductor gazed a moment on the sandwiches, and then hove them through the window, remarking: "Christian Endeavor sandwiches, I guess this is Lent, and they are playin' low on the meat."

A Toy Pistol.

Frederickton, N. B., June 22.—Yesterday afternoon a small boy in Gibson, across the river from here, took his toy pistol and went into a barn to play with it. A few minutes later he came rushing out crying, "Fire! Fire!" The fire spread quickly through the hay in the building, and the whole place was soon on fire.

A brisk wind was blowing at the time, and swept the flames directly toward the more thickly settled part of town. The Fire Department was practically helpless, and even the assistance sent from Frederickton was of little use, for when it had arrived the fire had gained such headway that nothing could stop it. It burned until late at night, and then went out simply because there was nothing more for it to burn.

The buildings destroyed comprised eighty dwellings, six stores, two churches, two public halls, and a railway depot and roundhouse. One hundred and thirty families are homeless, and were sheltered in Gibson and this city. The loss falls chiefly on mechanics and laborers. The destruction of property will amount to \$2,000,000. Very little insurance.

Involving the Ore Ledge Theory.

The case of Brook & Blowey vs. the Justice Mining Co., was concluded yesterday in the U. S. District Court and submitted on written testimony made before a Commissioner.

The plaintiffs claim the Peerless Lode adjoining the Justice and claim two separate ledges, fighting the old ore ledge theory of Crockstock ore formation.
